Yesterday at 8:52 am
[Details](#)

Hi Rick,

My name is Jack Thompson, I am a student from Monash University enrolled with the FIT3048 Industry Experience Studio Project. It is my understanding that you and your business wished to be involved in the program as Project Client.

My team of student software developers (team 17) have been assigned by Monash University to assist you and your business.

Last night at 5:30pm Monash Uni held a Client Meet and Greet Information Session over zoom. It had been our intention to introduce ourselves last night during this meeting. However, I can understand you may have been busy at the time and were unable to attend.

Would you be able to meet sometime this week so we might become more acquainted and develop a better understanding of what you would like to gain from this experience.

We happy to come meet with you in person at your place of work if that would make things easier for you. This initial meeting is expected to take about 30 minutes of your time.

Our teams availability:

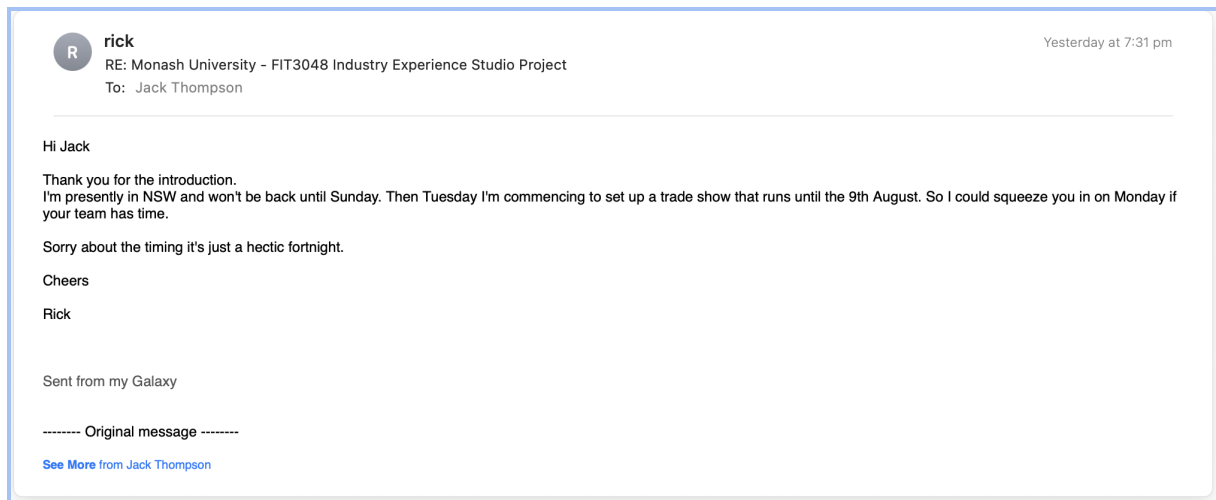

Thursday	3:30pm - 5:30pm
Friday	8:00am - 12:00pm

Please tell us whether you would be available to meet, and if so what time would suit you best.

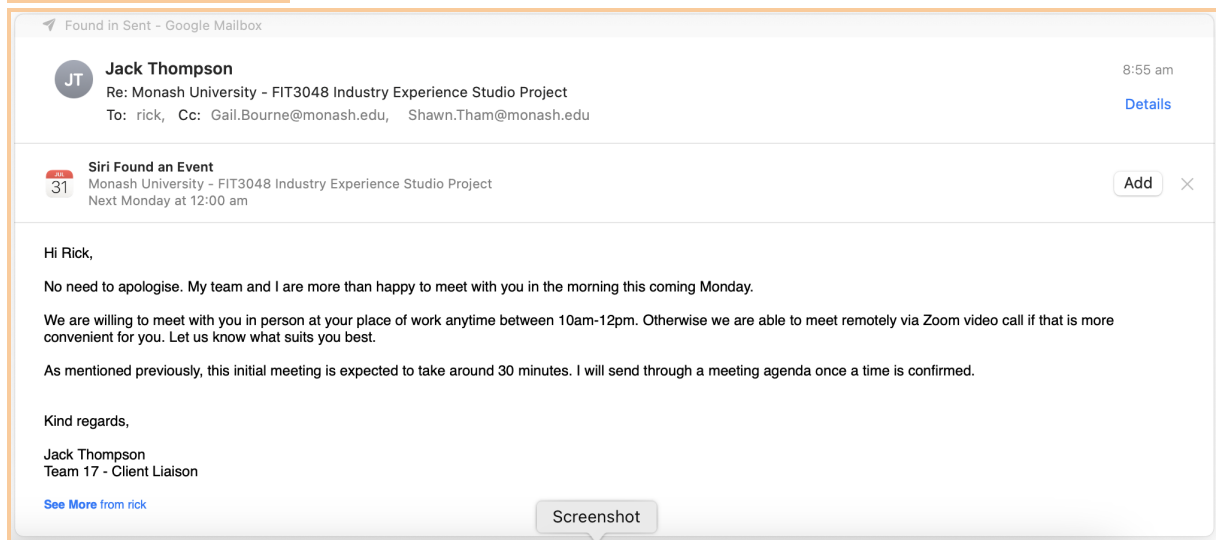

Kind Regards,

Jack Thompson
Team 17 - Client Liaison

Hi Rick,

I wanted to follow you up about some things we discussed during our previous meeting on Monday morning (31/07).

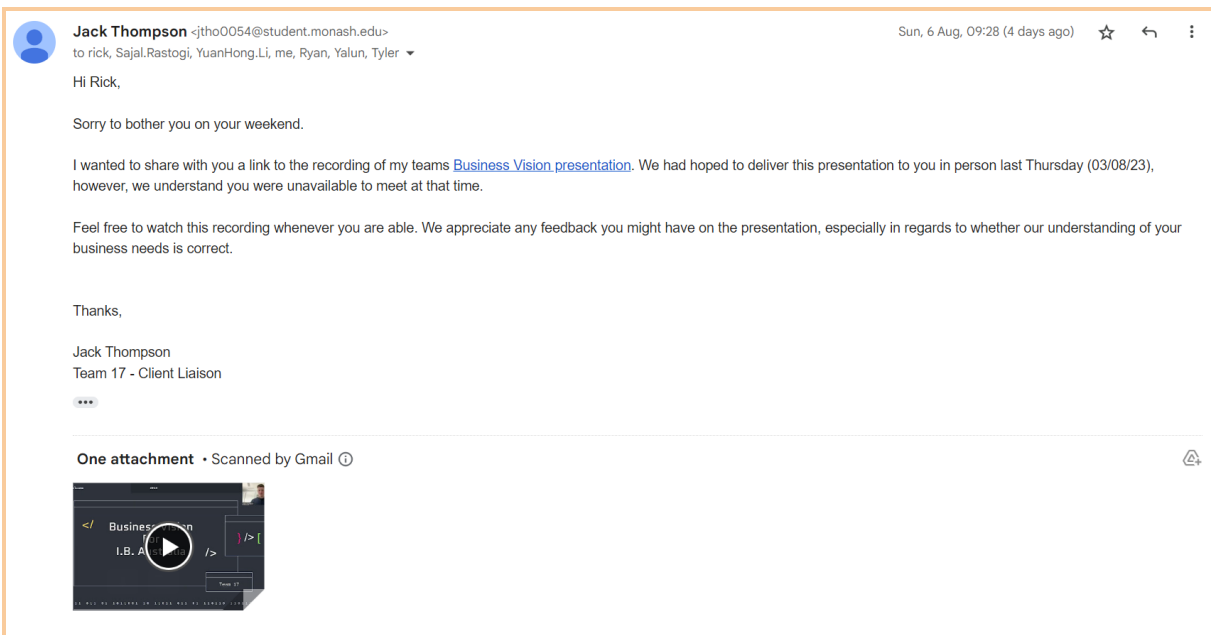

Would you feel comfortable providing my team with access to your MYOB account so that we can see how your business stores information concerning customers and products? Otherwise, if you do not feel comfortable providing this level of access, could you please provide us with some sample data to begin working on?

I believe you also mentioned you had a colleague named James who was familiar with MYOB based applications. Could you please share Jame's contact details with my project team in case we need to contact him in the future concerning technical issues with MYOB.

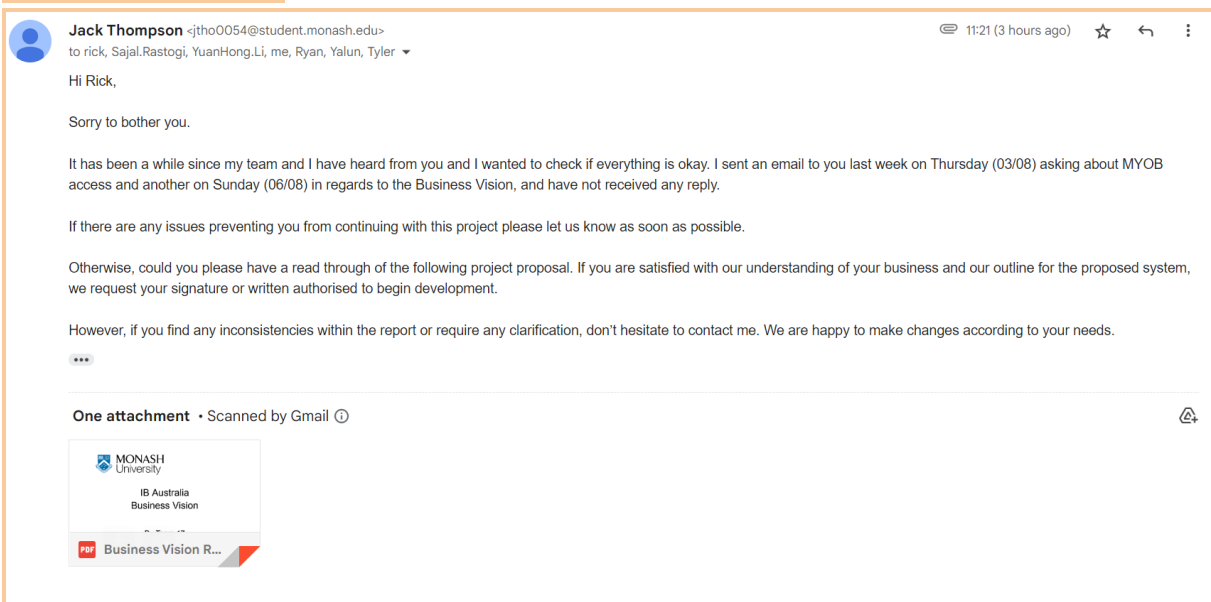

Thanks,

Jack Thompson

Hi Jack

My sincere apology.
 We have had a trade show that has taken all of my time.
 Tuesday a week ago we started the build and only now have I returned to the office.
 It's quite hectic as we serve customers all day then go out with some for dinner. Which left no time to view and respond to your emails.

Yes I can give you access to MYOB.
 But please allow a day or so for me to respond further as I have a lot of follow up from the fair.

If you have any further questions please don't hesitate in contacting me

Cheers,

Rick Blankenforth

Hi Rick,

I hope things went well for you at the recent trade fair.

Would you be free sometime this coming week to meet with my team and I? We were hoping to speak with you concerning your project requirements and our plan for the implementation of the new system, as well as share what progress we have made since we last met.

We are available to meet either in person or online via zoom during the following times:

Monday:	10:00am	-	12:00pm
Thursday:	3:30pm	-	5:30pm
Friday:	10:00am	-	12:00pm
Saturday:	2:00pm	-	8:00pm

This meeting is expected to take around 30 minutes. A meeting agenda will be shared with you once a time has been confirmed.

Thanks,

Jack Thompson

Hi James,

I have sent you an invite to Wednesday's zoom meeting.

Would you be able to provide us access to Rick's MYOB prior to our meeting?

My team and I would like to see how Rick stores his data and what applications he has connected with his MYOB account. Our current lack of access to Rick's MYOB has been a major setback in our development process.

I first requested MYOB access from Rick on 03/08/23, and again on 10/08/23. He has not replied since other than to share your contact details. This is why we are asking you for access and not Rick. We have fixed deadlines in our subject and I am concerned that further delays will jeopardise our ability to deliver for Rick.

If you cannot provide us with access, please contact Rick immediately on our behalf.

Thanks,

Jack

Hi James,

Could you please give us samples of data which can help us to answer the following questions.

Products

- What information does Rick keep about the different types of doormats he sells?
- How does Rick identify different types doormats and individual bales of doormats?
- If we were to scan a barcode on a doormat, what data does this correspond to in the database?

Customers

- What information does Rick record regarding customers?
- How does Rick identify individual clients and assign product orders to those clients?
- If we were to search for a client, what attribute would easiest to search by?

Thanks,

Jack

James Ji <jamesjxb@gmail.com>

📧 14 Aug 2023, 21:46 (3 days ago) ☆ ↶ ⋮

to Jack, Ryan, me, Tyler, Yalun ▼

Hi Jack,

Customer:

Each customer has an "UID" in MYOB but that is not visible to GUI users and is set automatically by the system, thus we often use "DisplayID" to identify customers, but I think MYOB actually allow different customers to have the same "DisplayID", but in our instance most customers have different DisplayID.
The easiest way to search for a client is "DisplayID".

Products:

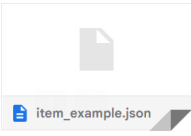

It also has that "UID", but the human way to locate a product is through its "number" (usually in the format of "23-xxxx" for our doormats). Barcode information will also be in the json file attached.

Contact me if you have any further questions.
James

Hi Rick,

Thank you for the feedback. We have added the trade show information to the business vision.

I have attached a couple of documents we would appreciate if you could have a look over:

1. Acceptance testing report. This contains an outline of the features delivered in this iteration. Please review this and test the system to ensure it meets your requirements. Any feedback will be discussed and will be added to be fixed or added in iteration 2.
2. Implementation plan. This report will give you an overview of the timeline of the deployment of the system as well as some of the risks involved with the deployment of the system.

Thanks,
Tyler

Hi Rick,

Apologises for the confusion. I was sick last week with the flu and Tyler was filling in for me whilst I was absent.

I want to let you know that Monash University has been having technical issues with its web hosting software. Our team is one of many affected by the current outage. If you have attempted to access the system within the last few days and encountered error messages or missing web pages, this is because of the current outage and not an issue with your new system.

Would you be available to meet with us in person this Thursday (31/08) at 5:30pm? We would like to provide you with an update on our progress and ask for your feedback.

Regards,

Jack Thompson

Hi James,

I just wanted to follow up our previous meeting last Monday.

Were you able to arrange web hosting, and if so could you please share the relevant web hosting details with our teams as soon as practical.

Thanks,

Jack Thompson

Hi,

I've reconsidered the decision with hostgator based on my recent experience with it and it seems pretty slow, not because it's bad, but because their servers are in the US.

Almost all of our customers are in Australia so I am working on getting an Australian hosting company to host it. I am pretty busy this week so feel free to give me some suggestions on hosting providers if you have one.

I am currently on a flight to China so I may not respond fast. Anyway send me an email or whatsapp if you guys have suggestions. Otherwise I'll decide myself and set it up for you before Monday.

James

Hi Team

We have noticed orders in MYOB that we don't know where they came from.
Have you been entering orders via your system?
If so you need to either let us know or delete them.

If you have any further questions please don't hesitate in contacting me

Cheers,

Rick Blankenforth

Hi Rick,

Yes we have been working on the submit order feature yesterday, and due to testing purposes we have created some orders to see if they are actually on there, please delete them if they confused you, thank you, sorry for the inconvenience.

Thanks,
Yalun Han

Hi Rick,

We have now reached the end of the second Iteration of development. Could either James or yourself please test the system to see whether the features provided meet your business needs.

The provided **Run Sheet** document provides you with the basic information necessary to begin testing. Whilst the **User Acceptance** document provides you with a means to provide feedback to us.

If you are satisfied with the current system please return a signed copy of the User Acceptance document. Otherwise please record any feedback you have within the document and return it to us via email as soon as possible.

The testing process should not take longer than 30 minutes of your time. We will be needing you to finish your testing by this coming Sunday (01/10/23) at the latest.

Thanks,

Jack Thompson

Hi Rick,

We are fast approaching the end of our time together for this project so I wanted to update you on what to expect in the coming weeks.

Industry Project Expo - Monday 16th October from 12:15 - 1:45pm
You are invited to attend the Monash University's Faculty of Information Technology's virtual expo for student projects. As a project team, we will be present at the Expo to showcase the features of your new system. If you are interested in seeing our presentation or want to have a look at other student projects, we encourage you to attend. This event will be online, facilitated by ZOOM video call.

Expo Zoom Link: <https://monash.zoom.us/j/81094280928?pwd=akZlMjYxTTBTQ1YybkpaalRSVXIQQT09>

Final User Acceptance Test - By Thursday 19th October
As part of the final project handover we will be needing you to test the websites functionality on your own device. As with the first and second iteration of development we will be sharing with you an acceptance testing report through which you can provide us with feedback. Please test that the system meets your business needs. If you are satisfied please return a signed copy to us, otherwise provide detailed feedback on what requires improvement.

UAT report will be sent later this week..

Client Sign Off + Exit Interview - By Friday 27th October
Once the new system has been successfully installed, you have had a chance to use the live system, and you are satisfied that the finished product satisfies your business needs, we will wrap up project handover with final project sign off. As part of the sign off we will share with you a complete copy of our code base, project documentation and design artefacts. Then we would ask for one last meeting so that we might conduct an exist interview and discuss your experience with us as a project team.

Exit Interview date to be discussed.

Regards,

Jack Thompson

Hi Rick,

I hope this email finds you well.

As mentioned in my previous email, we are fast approaching the end of the project timeline and are beginning to wrap up things on our end.

As part of the handover process could either James or yourself please perform one final User Acceptance Test on the system. I have provided the necessary testing instructions in the attached documentation. If you are satisfied please return a signed copy to us, otherwise provide detailed feedback on what requires improvement.

The sooner you can return this form to us, the more time my team will have to implement necessary changes.

Thanks,

Jack Thompson

Hi Rick,

I hope this email finds you well. I apologise that the team and I have not been more communicative these past few weeks. We are currently in the midst of our university exam period.

I wanted to let you know that we have finished the final installation of your new website on the web server that you have provided to us, and that we are now ready for the final project handover.

Would you be free this coming Wednesday sometime after 5pm to for one final project meeting?

We would like to confirm whether you are satisfied with the project and debrief you on your experience working with our team. If you are satisfied with the service we have provided we would ask that you provide us with your signature for the final project sign off following this meeting.

Thanks,

Jack Thompson

Hi Rick,

Thank you for meeting with us today. I would like to follow up what we discussed earlier.

A digital copy of the project handover package has been shared with you via Google Drive.

You may access it via the following link:

<https://drive.google.com/drive/folders/1mou1aVIGmYbuQENp4Yjuw3-mpTQEDEmM?usp=sharing>

I have also attached to this email a copy of the final project sign off document.

If are satisfied with the project in its current state, and have confirmed that you have access to the provided handover documentation, please sign the attached document and send us a copy via email as soon as possible.

If you have any questions don't hesitate to contact myself or any member of the project team.

Thanks,

Jack Thompson

Hi Rick,

I'm am sorry to hear that you have not been able to access the drive.

I believe the issue was caused by my using a Monash Uni Google Drive instead of my personal account. Monash Uni restricts who can access to their files. It is likely the university blocked access as you are external to the organisation.

Realising this issue I have re-uploaded the handover package using my personal email account. Please try to access it again using the new link I have attached to this email.

USB (Handover Package) – Google Drive
drive.google.com

Thanks,

Jack Thompson
