

TEAM 17

MEETING 31/07

27 JULY 2023 / 10:00AM

Attendees

Rick Blanken Forth (Client), Jack Thompson (Client Liaison), Aaron Han, Terese Dalapu

Apologies

Tyler Saito, Ryan So

AGENDA

I. Introductions

- Introduced to Team 17, Monash Team. Advised 2 team members were absent.

II. Interview

Background

- IB Australia is a B2B doormat business considered by Rick as
 - They import mats made in India on behalf of retailers in Australia
- IB Australia receives orders for door mats in person, by phone, through its company website, or via an online retailer
- The business then picks and packs orders for shipment before sending them to customers via courier
- Once packing is completed, customers are sent an invoice
 - If a requested product is out of stock, invoice is withheld until order is completed in full

Technology

- IB Australia utilises accounting software MYOB to manage orders, picking slips and invoices.
- Orders placed through the company website or an online retailer are automatically uploaded into MYOB system
- However, orders made in person or via phone call are recorded by hand, before being entered manually into MYOB system

Expectations

- Rick desires a system which will streamline the process involved with recording customer orders made in person or over the phone
- Specifically, Rick wants a software which will enable his mobile phone to read product barcodes, to quickly and easily add items to a customer's order
 - This will save time and reduce risk of error when compared to manually entering barcode information into the MYOB software.
- Overall project vision (as described by Rick)
 1. Allow creation of new orders from existing customer info
 2. Add items to order through scanning product barcodes
 3. Specify within the web based application the quantity desired of each product
 4. Sort order items by bin location within warehouse
 5. Save and store new order with MYOB software
- Time permitting, Rick also desires the ability to view availability and calculate freight cost for each product within an order

III. Schedule next meeting

Friday (11/08) to be discussed further to organise times

NEXT WEEK'S AGENDA

Presentation of Business Vision + Iteration 1 Priorities

(i.e. student's understanding of business needs, and initial plans for development)
