

TEAM 17

MEETING 17/08

17 AUGUST 2023 / 5:30PM

Attendees

Rick Blanken Forth (Client), Jack Thompson (Client Liaison), Aaron Han, Terese Dalapu, Tyler Saito

Apologies

Ryan So

AGENDA

I. Brief Overview of Business Vision

- Asked if there were any issues from the video and document sent, Rick stated nothing stood out as incorrect, currently no feedback to provide.
 - Rick requested the document is resent for official signing, Jack will resend

II. Showcase of Iteration 1

- Prefaced showcase by mentioning we were not able to get too much done due to MYOB access being granted yesterday (16/08/23)
- Demonstrated barcode, login and dashboard of current system
 - Rick's Feedback:
 - Wants to be able to see the password by clicking on an eye button to view password
 - Wants administrator (himself) to be the only one who can adjust passwords and not for other users
- Showed wireframes of planned rest of system
 - Rick's feedback:

- looks good, wanted to add a memo area to add notes if the delivery address is different from the one saved
 - Rick highlighted importance of usability on phones, Team advised designing for this is included and in mind
- Rick wanted to expand the system further, advised we are restricted by time and unfamiliarity with MYOB and will likely not be possible
 - Advised MYOB can switch between Quotes, Invoices and Orders, requested to turn the system into switching between. Advised likely unable to
 - Rick also stated a desire to be able to create a new customer to then begin a new order, also advised unlikely to fulfil.

MYOB

- Rick provided an overview of how MYOB ordering system worked on his end, provided a barcode for testing and a stock sheet
- Rick showed MYOB data can be exported to CVS and was displayed to team
- MYOB changes price based on amount of items selected,
 - < bale amount (roughly 4) = higher price
 - >= bale amount (more than 4) = lower price
 - Very rare for customers to order more than bale amount and at an unequal number, 99% of customers purchase in bale lots and other 1% would order less than bale amount
- MYOB field's for Barcode within data is under Available Fields for Items -> Name of Custom Field Number 2
- Rick provided stock sheet without headings and advised they were as below:

Existing stock	Shipment Coming	Number to sell
----------------	-----------------	----------------

III. General Notes About Communications

- Ran through acceptance testing, what we require and what Rick will be receiving from us in the coming week
- Rick advised no set date for meeting but for organising meetings:
 - Email needs a couple of days in advance for setting

- If something is important, best option is to call

IV. Schedule next meeting

To email to organise after acceptance testing

NEXT MEETING'S AGENDA

- Presentation of Iteration 2 Report
