

## 16 Aug 2023 | [Project technical support with James](#)

Attendees: [Jack Thompson](#) [James Ji](#) [Tyler Saito](#)

### Notes

- James Ji works for Rick on a casual basis providing technical support for his business.
  - He is not an employee of IB Australia, instead he is employed as a consultant.
  - He is currently studying a Masters in cyber security with Melbourne University, and therefore is available most days should we need assistance.
- James's preferred means of communication is via email
  -
- During the meeting James demonstrated how to access Rick's MYOB database, and walked Tyler through the installation process on his device
- How to access MYOB Database
  - Step 1: Search MYOB developer tools > MYOB Postman Collection
  - Step 2: Download and install postman
  - Step 3: Enter API Key and API Secret within Postman to create live connection to MYOB database
  - Step 4: Use GET function under table name to query database table
  - Step 5: Download selected data in either JSON or XML format
- Note:
  - If you download data in XML format you should be able to import directly into MySQL database via PHPmyadmin
- James explained that Rick does not currently have a means of hosting the system
  - However, he is willing to help with hosting closer to the due date
