

TEAM 17

MEETING 08/09

08 SEPT 2023 / 5:00 PM

Attendees

James Ji (Technical Advisor), Tyler Saito, Terese Dalapu

Apologies

Jack Thompson, Ryan So, Aaron Han

AGENDA

I. MYOB Questions

- *Where to locate standard price (bale price) and individual price?*
 - If pushed all results to MYOB the price will automatically adjust, just need to tell MYOB how many of each
 - *Rick would like to see subtotal price on the system*
 - Bale Price is always 25% off individual price
 - Bale Quantity in customer list. Bale quantity means how many mats there are in a package
 - Went through example
 - If he buys 5 the price is \$22.60 each.
 - If he buys 6, this is the base selling price and they will have a 25% discount applied
 - If he buys 7, he gets 25% discount on 6 and no discount for the other one
 - Base selling price = individual price
- *When creating an order, Rick wanted us to post the order back into MYOB, where in the collection should we look to get an example of that?*

>Sales

>Sale Order

>List all the Item Orders

- Try to push minimal info to MYOB to automatically generate the rest
- In Create a New Item Order Status must be open
- Don't need the text or anything as it will override what MYOB calculates.
- Try to use minimal information
 - Which mat? How many they ordered? MYOB will calculate the price
 - Need
 - Customer UID
 - Ship to address
 - Lines
 - Do not need:
 - Terms
 - Subtotal
- Can email James for help with deleting orders when testing if not confident with the MYOB software
- General advice: Just need to specify the customer and the quantity is all, most cases will give an error message and tell you what to do

II. Hostgator

- *Which credentials do we need to access this?*
 - James will talk to rick and have him setup payment to progress further with hosting
 - Will provide details soon

III. UI Question

- *When creating an order should default value be pre-filled to bale size(e.g. 4 or 6) or 1 to show it can be edited*
 - James is unsure and recommend to ask Rick during next meeting
